

Starting point: Mission Data Set - Messy Data Set

● Messy Storage

- Multiple instruments
- Multiple modes per instrument
- Multiple data products per instrument/mode
- Multiple types for those data sets
 - FITS, PDF, preview
- Heterogeneous metadata
- Released over long periods
 - 16 years for XMM
 - Data product evolution

● Messy to Arrange

- Links between data products
 - FITS -> preview
 - PDF -> JPEG
- Navigation path between data products
 - Following observation IDs
 - Following detection IDs
- Released over long periods
 - 16 years for XMM

Target: A Clear Data View

Asterics Workshop (Heidelberg 2016) (2016-06-10)

The ASTERICS project is organising the European Data Provider Forum and Training Event at the Zentrum für Astronomie at Heidelberg University, Germany.

This workshop gathered researchers and technicians on the topic of on-line publishing of astronomical data and services. It offered an opportunity to identify common challenges and problems, to exchange solutions, and to share perspectives.
